## INTERIEURFOLIE IS ENORM POPULAIR

Met interieurfolie kun je op een snelle en innovatieve manier een interieur renoveren en vernieuwen tegen lage kosten. Interieurfolie is stevig, zelfklevend vinyl, is eenvoudig toe te passen, toegankelijk én betaalbaar. De folie is door de hoge kwaliteit te vervormen met warmte en daardoor zeer geschikt voor het aanbrengen op verschillende ondergronden.

Het ruime aanbod bestaat uit 200+ kleuren en dessins. Van goud tot hout en van leer tot beton.

## DÉ RESTYLE OPLOSSING

Het interieur restylen blijft opvallend populair. Met interieurfolie geef je woon-, werk- en leefomgevingen snel en eenvoudig een compleet nieuwe uitstraling. Zonder breekwerk heb je de mogelijkheid om je interieur te vernieuwen. Van restyling tot renovatie en nieuwbouw, de mogelijkheden zijn oneindig. Interieurfolies zijn eenvoudig, toegankelijk én betaalbaar.

Interieurfolie is een stevig, zelfklevend vinyl. En zijn zeer geschikt voor het aanbrengen op vlakke of licht gebogen ondergronden. Door de hoge kwaliteit is de interieurfolie te verwarmen waardoor het te vervormen is en aan te brengen op verschillende ondergronden zoals rondingen, over hoekjes, sierlijsten en inkepingen.

## KEUKEN

Met zelfklevende interieurfolie geef je keukens snel en efficiënt een nieuwe uitstraling. Het grote voordeel van wrappen in plaats van overspuiten, is dat de folie stootvast en afneembaar is. Je kunt de folie zelfs gebruiken voor het aanrecht. Wrap de volledige keuken in iedere mogelijke kleur of dessin en creëer een unieke look. Het wrappen van de keuken is dé voordelige optie voor een nieuwe keuken. De interieurfolies van Bodaq en 3M DI-NOC zijn hier perfect voor.

## WANDEN & PANELEN

Geef ruimtes een unieke uitstraling. Het wrappen van wanden en panelen is vaak een betere optie dan schilderen of behangen en het plakken met interieurfolie heeft meerdere voordelen. Kies een folie met betonlook voor een industriële look of haal de natuur in huis met een warme houten muur die niet van echt te onderscheiden is. Marmer creëert een chique effect op de wand en effen kleuren zijn tijdloos. De wandfolies zijn slijtvast en makkelijk afneembaar en worden daardoor veel in ziekenhuizen toegepast. De folies hebben een voelbare structuur waarmee je diepte en sfeer geeft aan een interieur.

## MEUBEL

Creëer een 'nieuwe' inrichting door meubels te voorzien van interieurfolie. Door het wrappen van meubels met een nieuwe kleur of dessin zorg je voor een compleet nieuwe look. Denk ook aan winkelinrichtingen in herkenbare huisstijl. De mogelijkheden voor meubelwrapping zijn oneindig met interieurfolie.

## SANITAIR

De interieurfolies zijn onderhoudsvriendelijk, waterafstotend, slijtvast en de naden kunnen worden geseald. Hierdoor is ook de volledige badkamer geschikt om te restylen met interieurfolie. De badkamermeubels, de muren en zelfs het sanitair zoals bad en douche kunnen beplakt worden met een nieuwe kleur of dessin. Interieurfolie is enorm veelzijdig en vele malen goedkoper dan het plaatsen van een nieuwe badkamer en daardoor een ideaal alternatief, zowel zakelijk als particulier.

## Milieuvriendelijk

De folies zijn niet belastend voor mens en milieu door de speciale focus op gezondheid van productie tot toepassing.

## Duurzaam

De hoogwaardige folies zijn de perfecte ecologische en economische oplossing in het hergebruik van materialen. Het bevat geen schadelijke zware metalen als lood, cadmium, kwik, chroom, etc. Verder is het formaldehyde vrij, heeft het een lage TVOC emissie volgens de standaard ISO 16000 en het is gecertificeerd volgens de Korean-Certification standaard.

- Vrij van verontreinigende schadelijke stoffen
- Op CO2 emissies getest
- Biologisch keurmerk
- Antibacterieel oppervlak
- B1 brandcertificering
- Tot 10 jaar duurzaamheid
- UV-bestendig
- Hittebestendig tot 110° C
- Krasbestendig
- Waterbestendig

## Brandbaarheidstesten

- Brand lengte <20 cm
- Geen vallende branddruppels
- Brandduur <3 seconden
- Rookdichtheid <200 Ds
- Info volgens ISO 9239-1

## Kleine hoeveelheid metalen

De folies bevatten een kleine hoeveelheid zware metalen. Deze materialen en hoeveelheden zijn als volgt:

- Pb: 5.0 mg/kg
- Cd: 0.5 mg/kg
- Hg: 2.0 mg/kg
- CrVI: 1.0 mg/kg

Verdere conclusies niet beschikbaar.

## Formaldehyde gehalte

Het formaldehyde gehalte is als volgt:  
0.12 mg/m2h.

Verdere conclusies niet beschikbaar.

## Weekmaker gehalte

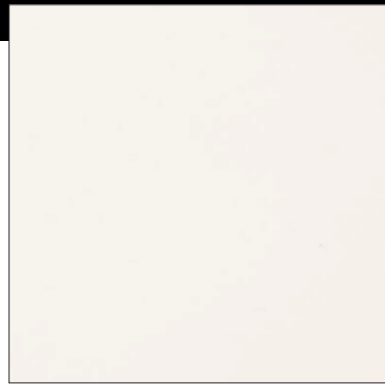

< 0.1% Phatalaat verbinding.  
Verdere conclusies niet beschikbaar.
